EDUCATION

Narsee Monjee College of Commerce and Economics

B.Sc in Information Technology — CGPA: 6.5

Sep 2020 – Jun 2024

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, C#
- **Frameworks:** Node.js, Express.js, React.js, Next.js, Fastify
- **Databases:** MongoDB, SQL Server
- **Libraries:** Redux, Tailwind CSS, Redis, JWT, Zustand
- **Tools:** Docker, TablePlus, PgAdmin4, Amplify, GitHub Actions
- **Platforms:** Azure DevOps, IIS, Web, Windows, Linux, AWS, GCP

EXPERIENCE

Empronc Solutions

Mumbai

Application Developer (Full-Time)

Dec 2025 – Present

- **Frontend & UI Modernization:** Developed 2 projects from scratch, ensuring pixel-perfect UI implementation from Figma designs and delivering seamless user experiences. Achieved 95% client satisfaction through iterative feedback loops and modern React.js patterns.
- **Technical SEO & Performance:** Improved website ranking from 7th to 3rd in the unlisted share category through technical SEO optimization. Implemented lazy loading and resolved indexing errors, resulting in a 40% increase in organic traffic and a 15% reduction in bounce rate.
- **ASP.NET MVC to React Migration:** migrated ASP.NET Web API application to React, significantly improving performance in rendering data-heavy tables and media content.

Prabhudas Lilladher Pvt. Ltd

Mumbai

Software Developer Engineer (Full-Time)

May 2024 – Dec 2025

- **PLSGB In-House Portal:** Engineered a secure SGB application portal with JWT-based authentication. Integrated RazorPay, facilitating over 5kg of SGB sales and achieving a revenue milestone of 3 million INR.
- **PLAdvisory Broker Management:** Architected a complex broker management system featuring dynamic dashboards, server-side pagination, and advanced filtering. Optimized frontend performance to achieve a Lighthouse score of 85+, reducing load times by 30%.
- **Trade-Script Real-time Dashboard:** Developed a Node.js backend with a real-time enabled frontend for live trade analysis. Enabled live data streaming for 50+ brokers, improving operational efficiency by 30% and reducing manual effort by 40%.
- **Automation & Scaling:** Automated image compression and report generation using CRON jobs, saving 6 man-hours daily. Streamlined data ingestion by implementing bulk insert functionality for large financial datasets.
- **EIPO Modernization:** Revamped the EIPO frontend using React.js, modernizing the UI/UX and improving interaction speed and system responsiveness by 20%.

PROJECTS

NexSync - Real-Time Communication Platform

MERN Stack — WebRTC, Node.js

- **Peer-to-Peer Architecture:** Built a custom WebRTC platform from scratch, enabling low-latency, peer-to-peer video conferencing and secure signaling.
- **Full-Stack Implementation:** Developed a scalable real-time engine using Node.js, ensuring seamless data synchronization across multiple clients.
- **Security & Features:** Implemented end-to-end encrypted messaging, screen sharing, and complex room management logic to ensure user privacy and performance.

Image Processing System

Node.js — AWS Cloud

- **Automation Pipeline:** Architected a serverless image analysis workflow using Step Functions, Lambda, and Amazon Rekognition to automate visual data processing at scale.

ACHIEVEMENTS

- **AWS Solution Architect—Associate SAA-C03:** Score 660/1000
- **AWS Cloud Practitioner Essentials:** Offered by AWS Training and Certification.
- **Introduction to Cloud & Machine Learning Foundation:** Offered by AWS Educate.
